

1.0 Example: Importing a Cube

This example will import a cube that was created in AutoCAD and exported as a SAT file.

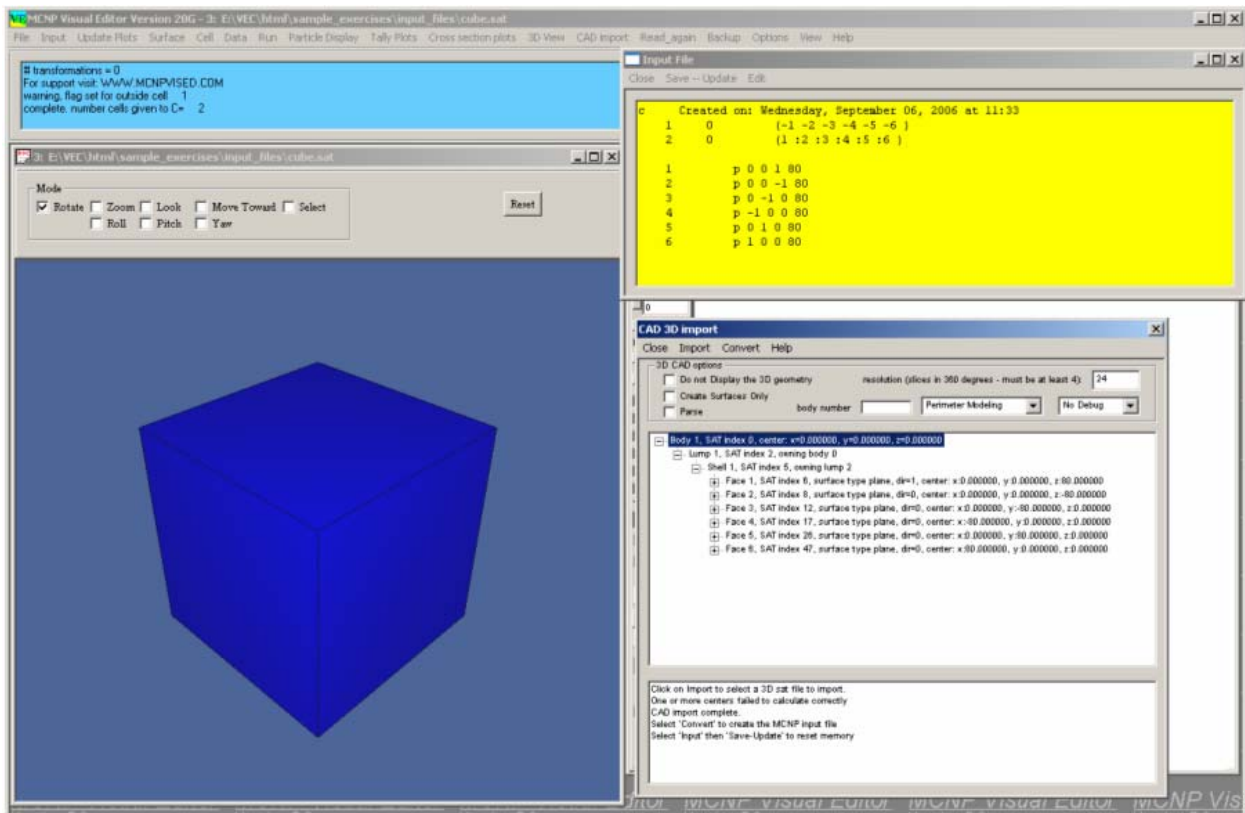

Figure 1-1 3D Display of Imported SAT Cube

Start the Visual Editor.

Click on **CAD Import...3DImport**.

On the CAD 3D Import panel, click **Import**.

Select the **cube.sat** file and click OK.

On the CAD3D Import panel, click **Convert**.

On the Main Menu, click on **Input** and view the created input file.
